
Stratification Musical Rhythm Yeston Maury Yale

theory of music-stravinsky - jonathan dimond - stratification stratification also relies upon opposition – a concept discussed already in our lecture on chromaticism. stratification is the spatial separation of musical ideas, juxtaposed in time. it might involve a glaring or subtle contrast due to changes in instrumentation, register, harmony, or rhythm. there is **understanding the percussion works of alejandro viñao: an ...** - the music of alejandro viñao is driven primarily by rhythm rather than traditional classical music components such as melody, harmony, and formal structures. as such, this focus on rhythm showcases the innovation of multiple time, defined as the musical simulation of various meters and tempi. **a formal approach for high-level automati rhythm g ration** - a formal approach for high-level automatic rhythm generation george sioros university of porto (faculty of engineering) ... a specific musical style. a stochastic model in which various aspects and qualities of the generated rhythm can be ... by metric indispensability and then calculating the weights based on the stratification levels. **a novel representation for rhythmic structure** - a novel representation for rhythmic structure ... we have developed a representation for musical rhythm and rhythmic structure based on concepts ... such as the stratification of different-length rhythmic cycles, creation of composite beat schemes, repetition, rhythmic progression, and most ... **charles ives. the unanswered question** - charles ives. the unanswered question (read composer's program, t351, p. 78 & listen to the work). questions for discussion: • what is the instrumentation of the work? how is it handled to represent the "program."? • aspects of layering, stratification, spatial relationships: how are these created? • aspect of rhythm: are events "measured"? **a formal approach for high-level automatic rhythm generation** - a formal approach for high-level automatic rhythm generation george sioros university of porto (faculty of engineering) ... a specific musical style. a stochastic model in which various aspects and qualities of the generated rhythm can be ... a formal approach for high-level automatic rhythm generation 235. figure 2: weight ranges ... **temporal elements: a cognitive system of analysis for ...** - maury yeston, who at the end of the stratification of musical rhythm adds the disclaimer that his theories are "... limited to a kind of tonal music in which the middleground rhythmic levels exhibit some regularity of motion." (yeston, 1976: 148) others, like jonathan kramer's *the time of music* (kramer, 1988), **society for music theory** - society for music theory harmony and meter in the theories of simon sechter author(s): william earl caplin ... argues that an integration of all musical parameters, including rhythm, underlies the theories of sulzer, kimberger, and koch ... the stratification of musical rhythm (new haven, 1976), p. **metrical transition and resolution in the music of blindside** - discussions of rhythm in rock music in relation to riffs, forms and other levels of durations and proportions are often hampered by a confusion between rhythm and meter and how these arise from the grouping structures of harmonies, melodies, bass notes, phrasing, and other musical features.³ **youth and popular music: a study in the sociology of taste** - youth and popular music: a study in the sociology of taste abstract preferences in popular music among teen-age girls vary according to the neighborhood in which a girl lives and her relative popularity among her peers. highly popular girls are shown to conform more closely than the less popular to the prevailing neighborhood norms in popular ... **automatic rhythmic performance in max/msp: the kin ...** - time signature without belonging to a specific musical style. the algorithm is based on a stochastic model in which various aspects and qualities of the generated rhythm can be controlled intuitively and in real time. such qualities are the density of the ... calculating the weights based on the stratification levels. **metric conflict in the brandenburg concertos a thesis ...** - yeston, the stratification of musical rhythm (new haven and london: yale university press, 1976), p. 26. this approach is still reflected today in the tendency of some contemporary theorists to concentrate on the presence of four-bar hypermeter without ever noting that this cannot exist without an underlying level of two-bar hypermeter; e.g ... **cubanidad o desigualdad: the impact of post-revolutionary ...** - cubanidad in all its forms – through musical rhythm, ancestry, and race. this music has provided the soundscape for tensions over race relations that the revolutionary government declared resolved, as well as the economic strain of the special period in the 1990s. at the same time, the **mto 13.3: benadon, a circular plot for rhythm ...** - circles that describe the stratification of polyrhythm. in the work of toussaint (2005) and mclachlan (2000), the circle facilitates mathematical explanations of rhythm such as maximal evenness and similarity measures. [5] hence, we find two parallel practices: (1) the graphical representation of expressive timing and (2) the circular
